

Robin Ellen Leder, M.D.

Dr. Leder's

HCG DIET

at our Center for Natural Weight Loss

Dr. Leder began her career with Dr. Robert Atkins (creator of the Atkins Diet). She is one of the leading experts in natural diet therapies in Northern New Jersey.

Safe, Fast & Most Effective Weight Loss

www.drlederhcg.com

In 1954, British endocrinologist Dr. Albert T.W. Simeons published his now classic paper introducing natural hormone, HCG (Human Chorionic Gonadotropin) as a remarkably effective tool in greatly reducing appetite and inducing both rapid and long lasting weight loss. Since then, it has been used safely and successfully by thousands of dieters worldwide to lose up to 3 pounds daily.

Lose 1-3 pounds daily!

Easy to do, Medically-Supervised

On this plan, HCG is paired with a very low calorie diet, consisting of wholesome fresh foods. This diet would otherwise be very challenging to follow, but is easily tolerated while using prescription HCG to reduce hunger. The HCG diet is exceptional for quick weight loss and especially effective in eliminating stubborn deposits of fat that are often left untouched by standard diets. Unlike many advertised programs, our program is genuinely and consistently supervised by a physician. In selecting a program where injections are used, you should settle for nothing less.

Our HCG Program Includes:

- A complimentary introduction to the diet
- A detailed diet instruction session
- Physician performed medical clearance and physical exam
- Review of diet related lab work
- All HCG supplies
- Unlimited coaching sessions throughout the diet
- Instruction and guidance in weight loss maintenance
- Follow-up consultation with physician

Options to Enhance Success:

- Thyroid and metabolic screening
- Removal of lead and mercury (Chelation)
- IV vitamins and MIC injections (to aid in fat burning)
- Bio-identical hormone replacement therapy
- Testing to determine vitamin deficiencies and food sensitivities
